Danylo Deineka

Frontend Developer

danildeineka22@gmail.com +380982916616 @TripleDD Linkedin GitHub

Kyiv, Ukraine

Summary

Frontend developer with 3 years of commercial experience building web applications using Nuxt 3, Vue.js, TypeScript, React, Tailwind CSS, and gRPC. In addition to feature development, I have driven engineering improvements by leading the Tailwind v4 migration, contributing to the implementation of SSR, building internal automation tools that improved A/B test development and actively participating in code reviews and mentoring new developers.

Skills

- JavaScript/TypeScript/HTML5/CSS3/SASS
- Vue 3/Nuxt 3/React/Redux/Tailwind
- REST API/gRPC/Node.js
- Git/Vitest/Figma/Sentry/Microsoft Clarity
- Claude Code/Gemini
- English: B2

Professional Experience

Frontend Developer *05/2024 – 07/2026*

SKELAR Kyiv

- Developed web funnels and product features using Nuxt 3, Vue.js, TypeScript and Tailwind CSS.
- Built and maintained A/B tests to validate marketing hypotheses and improve conversion rates.
- Led the migration to Tailwind CSS v4, improving the maintainability of the frontend codebase.
- Contributed to the implementation of SSR, enabling more flexible marketing experiments.
- Created an internal Figma Design Tokens exporter that drastically reduced the setup time for developing and launching new A/B tests from hours/days to just 5 minutes.
- Improved frontend performance and development workflows, helping accelerate feature delivery.
- Integrated frontend applications with backend services using gRPC.
- Used Sentry and Microsoft Clarity to monitor production quality, investigate issues and analyze user behavior to improve funnel performance.
- Performed code reviews, mentored new developers and helped maintain code quality across the project.
- Worked closely with Product Marketing and Design to deliver experiments quickly and align technical solutions with business goals.
- Used AI-assisted development tools (Claude Code, Gemini, MCP) to speed up development, debugging, code reviews, and technical research.

Frontend Developer *07/2023 – 05/2024*
Petopia

- Developed a responsive web application from scratch using React and Tailwind CSS, supporting mobile, tablet and desktop devices.
- Operated as the sole Frontend Developer, taking responsibility for end-to-end frontend implementation and successfully delivering the project's MVP from scratch.
- Developed new features alongside backend developers, connecting the UI to REST APIs and handling global state via Redux.

Education

Master's degree in Logistics *2022 – 2023*
Kyiv National Economics University

Bachelor's degree in International Relations *2018 – 2022*
Kyiv National Economic University
