SUMMARY

Product Manager with a background in customer care and product operations at Wix (5 years), where I built internal tools, drove data-informed improvements, and translated user feedback into measurable outcomes. Currently working part-time as Product Manager at CyberField NeT — responsible for product strategy, new product launches, market and user research, and ongoing product improvements — while actively seeking a full-time opportunity. Completed PM specializations at Projector and Choice31 & Kiss My Apps with 4 real client projects.

EXPERIENCE

Product Manager (part-time) · **CyberField NeT** *Aug 2026 – present*

- Driving product strategy and roadmap for a Ukrainian cybersecurity startup on a part-time basis, while actively seeking a full-time PM role.
- Conducting market and user research to identify opportunities and validate product direction.
- Leading new product launches and ongoing product improvements across the full product lifecycle.

Customer Care Team Lead · **Wix.com** *Oct 2021 – Aug 2026*

- **Built two internal tools from scratch using Base44**: a device-preview app (**now used by 30+ experts daily**) and a Seniority Mapping framework used across Team Leader performance cycles — delivered end-to-end from discovery to launch.
- Led handover analysis for the Business Bundle: identified root causes of support escalations, aligned 4 stakeholder teams on recommendations, and drove chatbot routing changes that **reduced unnecessary handovers by ~7%**.
- Conducted CSAT & DSAT trend analysis to surface product pain points in Hotels and Invoices — delivered prioritized action plans that contributed to a **~3% improvement in CSAT score** over two quarters.
- Ran structured feedback cycles with 10+ Customer Care Experts; translated findings into product and process changes delivered to Product and Delivery teams.
- Coordinated cross-functional projects with Product, PSG, QCI, WFM, Mentors, and L&D — including Business Bundle All Hands, Monthly Reviews, and escalation flow redesign.
- Created performance management guidelines for Team Leaders covering the full employee journey — adopted company-wide within the Customer Care org.

Customer Support Team Lead · **Namecheap** *Jan 2021 – Sep 2021*

- Managed team of 8, ran regular performance reviews, and monitored workload distribution across queues to maintain SLA coverage.

Customer Support Specialist · **Namecheap** *Jul 2019 – Jan 2021*

- Resolved domain-related issues; maintained top-10% performers rating within the support team.

PROJECTS

Growth Strategy & CJM — Vodafone FMC Combo Tariff *Jun – Jul 2026*

Projector PM Course · Real client · Competitive benchmarking (Kyivstar, lifecell)

- Conducted an Instagram survey of Vodafone and Kyivstar subscribers to measure awareness of bundled tariffs — found that **92% of Vodafone subscribers had never heard of the Combo tariff**, vs. 52% for Kyivstar's equivalent.
- Identified a critical in-app visibility gap: only **4% of Vodafone subscribers** noticed the Combo tariff in the app, compared to **26% for Kyivstar** — revealing placement as the core driver of low awareness.
- Validated demand: **7 out of 26** surveyed Vodafone subscribers who were unaware of Combo expressed interest once informed — confirming untapped conversion potential.
- Benchmarked how Kyivstar and lifecell surface bundled tariffs in their apps, built **AS-IS and TO-BE customer journey maps**, and developed a **testable hypothesis** with defined A/B test metrics.
- Designed **UX mockups** of the proposed placement and delivered a stakeholder-ready defense presentation to the client.

NextBite — AI-first iOS Nutrition Tracker

Jun – Jul 2026

Kiss My Apps Mobile PM & Choice31 Course · Capstone project · iOS app concept

- Analyzed the nutrition app niche via Sensor Tower: market MMR **$28.2M**, **+13.7% YoY** growth; researched 11 competitors and analyzed 27,390 App Store reviews across 6 apps.
- Built a Feature Matrix (40 features × 6 competitors) and identified an **unoccupied gap**: no competitor proactively answers 'what to eat next' — defined this as the core USP.
- Prioritized a backlog of 40 features (P0/P1/P2), scoped MVP to 5 features (~300 dev hours), and developed **5 hypotheses with ICE scoring** and go/no-go success metrics.
- Built a 24-month financial model across 3 UA channels: break-even at M4–M7, projected **Revenue M24 $1.18M**; prepared a 19-slide pitch deck.

Product Analytics & Growth — Confidential B2C Marketplace

Apr – Jun 2026

Projector PM Course · Real client · NDA

- Conducted **quantitative funnel analysis in GA4** to identify where users drop off on the path to subscription, revealing a critical visibility gap between product page traffic and subscription page reach.
- Developed a **data-backed hypothesis** to improve subscription visibility across 4 key touchpoints, supported by competitive analysis and behavioral pricing research.
- Identified that a small segment of repeat customers generates a disproportionate share of revenue, establishing subscription conversion as the highest-leverage retention lever.
- Designed **UX mockups** for proposed changes and defined a measurable success metric tied to GA4 event tracking, with a 60-day validation window.

PM Discovery Project — Employer Branding Community

Mar – May 2026

Projector PM Course · Real client · 86-member paid community

- Conducted 10 user interviews with target audience to uncover barriers to conversion from free to paid subscription.
- Built a research wall with clustered insights, value proposition canvas, and customer journey map to map the full user experience.
- **Identified onboarding as the critical drop-off point**: new subscribers were unaware of key platform features, leading to low renewal rates.
- Delivered discovery findings and hypothesis backlog to the client, focused on awareness growth, onboarding redesign, and conversion to paid subscriptions.
